ABHISHEK RAJ POUDEL

FULL-STACK ENGINEER | CREATIVE DEVELOPMENT

Nepal • abhishekrajpoudel.com.np • abhishekrajpoudel@gmail.com • linkedin.com/in/abhishek-raj-poudel

PROFESSIONAL SUMMARY

Full-stack developer and Technical Coordinator at Infinity Development Enterprise (IDE), working across web application development, technical planning, delivery coordination, QA, and production support. Builds with Laravel/PHP, React, Next.js, TypeScript, and MySQL, with hands-on experience supporting deployments, debugging live systems, and translating requirements into actionable development work. Interested in combining solid engineering with thoughtful UI implementation, interaction, and creative development.

TECHNICAL SKILLS

Languages & frameworks: PHP, Laravel, JavaScript/TypeScript, React, Next.js

Data & integration: MySQL, APIs, third-party integrations

Infrastructure & delivery: Git, Docker, Linux/VPS, deployment troubleshooting

Web & content platforms: WordPress

Engineering practices: Responsive UI implementation, QA coordination, debugging, technical documentation, task planning

PROFESSIONAL EXPERIENCE

Technical Coordinator | Infinity Development Enterprise (IDE)
April 2023 – Present | Nepal

- Coordinate web and digital solution delivery from requirements and technical scoping through task breakdown, timelines, development follow-up, QA, and handover.
- Translate project requirements and reference research into actionable frontend and backend tasks; coordinate assignments, milestones, stand-ups, and blocker resolution.
- Contribute hands-on to web development using Laravel/PHP, React, Next.js, TypeScript, MySQL, WordPress, and API integrations as project needs require.
- Support deployment and production troubleshooting across Linux/VPS environments, including application, web server, database, and resource-related issues.
- Oversee QA activities, follow up on bugs and implementation details, and support documentation and handover.
- Coordinate with technical leads, project stakeholders, developers, and clients to clarify requirements and keep delivery moving.
- Support related digital work such as SEO checks and website content/implementation coordination.

SELECTED PROJECTS

Umrao Cashmere — E-commerce / inquiry platform
Contributed to planning and technical investigation for a custom Laravel + Inertia/React platform with product inquiry workflows, OTP-based inquiry submission, MOQ/quantity handling, and admin management. Supported investigation of production hosting and resource issues.

BarCode Nepal — Web platform and production support
Worked with the production and staging environments, including Git-based deployment workflows and investigation of availability and server-resource issues.

Sujal Dairy / Safal — Brand and website delivery
Supported website content and page planning across product categories, farmer-focused content, store locator, recipes, news, events, and related brand sections.

Kucho Cleaning Services — Website redevelopment
Worked within the website redevelopment workflow, contributing to planning and coordination of implementation and delivery.

EDUCATION & DEVELOPMENT

Self-directed learning — Ongoing practical learning through building and maintaining web applications, exploring modern frontend techniques, and working with production systems.
